

On June 9, we will introduce a product that will revolutionize the event and entertainment industries. Again.

Our products have been revolutionizing the industry for years:

2000: ScreenPRO High-Resolution Seamless Switcher
ScreenPRO was the rental and staging industry's first affordable high-resolution seamless switcher. ScreenPRO's superior image quality and powerful features quickly made it the industry standard.

2002: BlendPRO Wide-Screen Image Processor
BlendPRO gives event producers the ability to create seamlessly blended wide-screen images quickly and easily, with the same professional image quality only found in much more expensive systems.

2003: MiPIX Modular Intelligent LED pixel block
MiPIX's small size and shape allow for it to be used to create intelligent lighting effects on large-scale backdrops of any form, shape or size. Full video content on 3D logos or other free-form shapes is also possible. MiPIX is already redefining the look of large-venue staging events.

And this year, we introduce **ENCORE**.

Never before has this industry seen one box that is so expandable, that can support up to 6 independent overlays with a transitioning background and can be used in a single-screen, multiple screen or widescreen application. ENCORE does this and so much more.
